important information

The past performance of an investment is not a guide to future investment performance.

What you get back will depend on investment performance and is therefore not guaranteed. The value of investments and any income from them can fall as well as rise.

You should appreciate that there are inherent risks in all types of investment. There can be no guarantee that the objectives of the Fund will be achieved.

Where the Fund invests in securities designated in a different currency to the Fund, the value of the Fund may rise and fall purely as a result of exchange rate fluctuations.

The annual management charge (AMC) is taken out of the Fund's capital rather than income. This may restrict or reduce the capital value of your investment.

Funds that invest in a particular region or market sector may be more risky than funds that invest in a number of regions or sectors.

Skandia Investment Group is a trading name of Skandia Investment Management Limited. Skandia Investment Management Limited is authorised and regulated by the Financial Services Authority, FSA Registered Number 208543. Registered in England and Wales. Registered Number: 4227837. Registered office: Skandia House, Portland Terrace, Southampton, SO14 7EJ.

The Authorised Corporate Director for the Skandia Equity Income Fund is Skandia Investment Management Limited.

top ten holdings

as at 30 November 2010

Stock	Holding %
Vodafone	4.91%
GlaxoSmithKline	4.73%
Royal Dutch Shell	4.27%
HSBC	3.99%
BP	3.54%
AstraZeneca	2.47%
British American Tobacco	2.14%
Merck & Co	1.69%
Centrica	1.66%
Unilever	1.47%

For this reason you should consider your degree of exposure to this Fund in the context of all your investments.

The Historic Yield reflects distributions declared over the past twelve months as a percentage of the mid-market unit price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distribution. All of the Fund's expenses are charged to capital. This has the effect of increasing the distributions for the year and constraining the Fund's capital performance to an equivalent extent.

* Quartile - A statistical term which, in this context, describes the performance of an investment fund relative to other investment funds in a group or sector. Each quartile contains 25% of the funds based upon the performance of each fund in comparison to other funds in the group or sector. The funds are ordered by performance with the top performing 25% of funds making up the 1st quartile and the worst performing 25% of funds making up the 4th quartile.
