ethical investment criteria

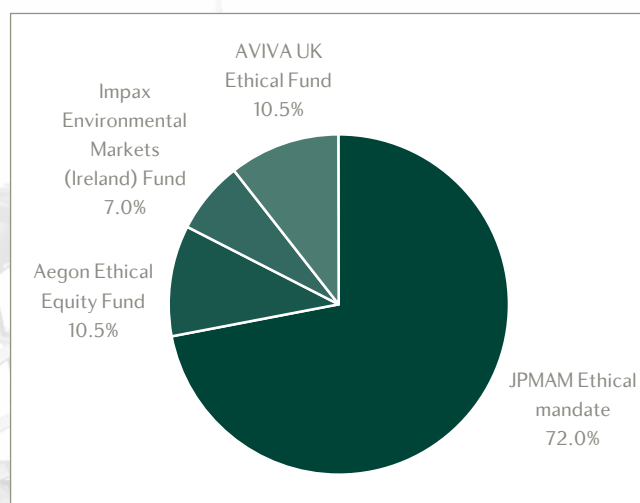

The Fund's ethical investment criteria are among the strictest available because this is what we believe the majority of UK ethical investors are looking for.

The screening criteria applied to the JPMAM mandate are under constant review and will be adjusted to reflect changing circumstances and emerging concerns. The criteria also apply to the Ethical Fund as a whole and the retail funds must therefore satisfy the ethical criteria for the fund.

For further details of our ethical screening process, please see our Ethical Fund brochure.

important information

The past performance of an investment is not a guide to future investment performance.

What you get back will depend on investment performance and is therefore not guaranteed. The value of investments and any income from them can fall as well as rise.

When you cash in your investment you may get back less than you invested, especially in the early years.

You should appreciate that there are inherent risks in all types of investment. There can be no guarantee that the objectives of the Fund will be achieved.

Where the Fund invests in securities designated in a different currency to the Fund, the value of the Fund may rise and fall purely as a result of exchange rate fluctuations.

You should be aware that the use by the Fund of derivatives for the purpose of efficient portfolio management exposes the Fund to the risk that the provider of the derivative becomes insolvent while it owes money to the Fund.

Due to the ethical investment criteria, the Fund is unable to invest in certain stocks and, as a result, may be more volatile than some more diversified funds.

* Quartile - A statistical term which, in this context, describes the performance of an investment fund relative to other investment funds in a group or sector. Each quartile contains 25% of the funds based upon the performance of each fund in comparison to other funds in the group or sector. The funds are ordered by performance with the top performing 25% of funds making up the 1st quartile and the worst performing 25% of funds making up the 4th quartile.
